SALT LAKE

(MAKOUT UNIVERSITY)

B.TECH IN COMPUTER

SCIENCE ENGINEERING

AUG 2022 – Present

Kolkata, India

CGPA:- 7.77

(Till 4th Sem)

KISHORENAGAR

SACHINDRA

SIKSHA SADAN

2016 – 2022 | Contai, India

Class XII : 93.3%

Class X : 93.2%

SKILLS

PROGRAMMING

Languages :

- Java •C •JavaScript •Python
- TypeScript

Frameworks :

- Node.js •Express.js •React.js
- Next.js •Bootstrap •Tailwind
- EJS •Redux Toolkit

DataBase :

- MongoDb
- MySQL

Familiar :

- Spring Boot •AWS
- Docker

Java Backend Development

EXPERIENCE

OCTANET SERVICES PVT LTD|WEB DEVELOPMENT INTERN

AUG 2024 – OCT 2024 | Remote, India

- Fixed Bug and added minor functionalities to the frontend
- Resolved critical backend service bugs by conducting thorough API testing with **ThunderClient** ; established a new testing protocol that has increased code reliability, leading to a **40%** reduction in post-deployment issues.
- Implemented **lambda function** in the AWS serverless framework.

PROJECTS

EDU PRO | PROJECT | SOURCE CODE

- Analyzed and Implemented a dynamic web application with a robust backend using **Node.js**, **Express.js**, **TypeScript interfaces**, and a **MongoDB** database.
- **Implemented Stripe payment integration**, comprehensive user analytics, Next.js authentication, course management (CRUD operations), a review system, and **automated notifications via email**.
- **Created multiple pages** seamlessly using the **Next.js App Router** and leveraged **EJS** for the email and notification systems.
- Utilized **hooks** and managed state efficiently with the help of **Redux Toolkit**, ensuring smooth data flow across the application.
- **Crafted a user-friendly frontend** using **Tailwind CSS** along with other modern frameworks to enhance the overall user experience.

JOBSHUNTER | PROJECT | SOURCE CODE

- Developed and designed a web application with a backend on Node.js, Express.js, Javascript, and MongoDB database.
- Create a separate web page for students and Recruiter, Search for job Operation, update profile, apply for job (for student), and **CRUD** Operation for Job and Company etc(for recruiters).
- Engineered seamless state management for a web application by implementing hooks and the Redux toolkit, resulting in enhanced data flow efficiency that led to resolving over 200 user-reported issues swiftly.
- Enabled a smooth and user-friendly fronted part using **React.js** and **Shadcn. ui**.

WANDERLUST | PROJECT | SOURCE CODE

- Prepared a web project for a hotel booking system according to user requirements, search hotels, and CRUD operation for hotels. Enable Review System, Show current location using MapBox API, Smooth Login / SignUp system.
- Tech Used: **Node.js**, **Express.js**, **MapBox Api**, **JSON**, **EJS**, **MongoDB**.

ACHIEVEMENTS

LEETCODE | Top 10% users

- Leetcode 250+ problems Solved
- Rank 1000 / 60k + (Top 2%) in Weekly Contest – 412

HACKERRANK | 5 Star

- 5 Star in Java and C Problem Solving

OTHER ACHIEVEMENTS

- 88.3 percentile in JEE(M)-22
- WBJEE Rank -5271
